

SOLENIS HAZARD COMMUNICATION GLOBAL POLICY

Purpose:

The Hazard Communication Policy provides basic principles to ensure safety is prioritized and considered within every aspect of the lifecycle of Solenis chemical products. Solenis, as a Responsible Care¹ company, has a long-standing commitment to product stewardship and the practice of making health, safety and environmental protection an integral part of the entire lifecycle of these products. We develop transformative solutions for the world's water and hygiene challenges, collaborating with customers to realize equitable, efficient and healthier environments.

Scope:

The scope of our hazard communication policy is company-wide, applying to all commercialized Solenis chemical products in all regions and all Solenis divisions.

Policy:

Our code of conduct requires that all Solenis chemical products comply with applicable regulatory requirements. Solenis is subject to federal, national, state, provincial, local, and international laws, regulations and standards. In line with this compliance policy, we ensure adherence to all relevant legal obligations. Solenis hazard communication policy:

- Monitor and comply with all applicable hazard communication related regulations, laws, internal policies and standards across the globe.
- Identify and communicate product safety hazards by providing regulatory documents (Safety Data Sheets and product labels) that highlight intended product applications, as well as safe use, handling, and transportation of Solenis finished goods.
- Routinely review globally available data from trusted sources on our chemical ingredients to obtain the most up-to-date health, safety, and environmental information.
- Assess all raw materials used to manufacture Solenis products for safety and compliance
- Provide emergency support to both internal and external customers in responding to product safety concerns and adverse events.
- Register products with local poison centers, as required by law, to ensure professional medical support for Solenis customers.

Responsibility:

Solenis Product Regulatory Department is responsible for the content and implementation of this policy.
